

Together we lead change

The University of Minho and the National Board of Medical Examiners embraced the mission of creating a Master in Assessment in Health Professions Education to build an international community of practice committed to the translation of the latest evidence in the medical education literature into high quality, customized, fair, engaging and innovative assessment systems.

MAPS will train health professionals around the world to apply the latest innovations in medical education and research in the field of evaluation

empowering them to face the new challenges present in their communities. Also, it allows health professionals to elaborate and implement an educational project based on assessment at their home institution, thus causing a lasting impact in their academic communities.

MAPS also aims at creating a community of international experts to exchange good practices and experiences.

PARTNERS

Universidade do Minho
Escola de Medicina

The School of Medicine (EMed) of the University of Minho (UMinho) inaugurated its Medicine course in 2001 and since then has been leading the curriculum modernization nationally and internationally. Besides the pre-graduate training, EMed ensures Master's and Doctoral programmes in Medicine and in Health Sciences.

www.med.uminho.pt

The National Board of Medical Examiners is the body responsible for licensing the medical practice across the USA. For this reason, NBME has a great experience in practices of evaluation having been pioneers in the application of the methodologies used globally.
